

# Will's passing patterns

by Will Murray, <http://web.csulb.edu/~wmurray>

I wrote down these notes after a convention in Alby, Sweden in January 2007 and last updated them on July 29, 2015. The point was just for me to remember stuff I would like to work on with my wife Rhonda Murray and my other passing friends. The notes are very Will- and Rhonda-centric (e.g. “Inventor” really means “who taught us the pattern”), but other people are welcome to try them if they’re interested. Let me know how it goes!

I made the diagrams below using JoePass!, an outstanding program by Wolfgang Westerboer.

On my website, I have more complete articles on several classes of patterns that are not listed in these notes:

- Two person passing patterns by Will:
  - Long Beach Popcorn
  - Scratch Your Head
  - 7 Club Doubles
- Moving and stealing patterns by Aidan Burns and the German takeout artists:
  - Bounceabout
  - Chopabout
  - Scrambled V
  - Scrambled 3V

Other good resources for passing patterns:

- Aidan's page at <http://www.geocities.ws/aidanjburns/passing.html>.
- Madison book at [http://www.madjugglers.com/sites/default/files/Madison\\_Patterns\\_V1-2.pdf](http://www.madjugglers.com/sites/default/files/Madison_Patterns_V1-2.pdf).
- The passing database at <http://www.passingdb.com/>.
- The passing wiki at [http://passingwiki.org/wiki/Main\\_Page](http://passingwiki.org/wiki/Main_Page).
- Mark Weston's compendium at <http://www.varietyartsdirectory.com/resources/PassingPatternsAug06.pdf>.
- jugglingfan's list at <http://jugglingfan.org/wiki/pmwiki.php/Patterns/Main>.
- Aerial Mirage Jugglers at <http://www.gnerds.com/juggle/patterns.php>.
- Berkeley patterns at <http://www.berkeleyjuggling.org/patterns.php>.

## 1 55513p

Clubs: 7

Inventor:

Will and Rhonda. . .

Jugglers: 2

We got this from Peter Kaseman, but other people do it.

can do this forever, with occasional tricks (replacing 5551 with 7441, 6451, 5641, 7531, 4444 on singles, etc.).

### Related patterns

Add a club:

Other related patterns:

Par, which is symmetric.

Sympar

55513pFeed

## 2 55513pFeed

Clubs: 11

Inventor:

Will and Rhonda. . .

Jugglers: 3

Will

haven't done this. Will did it with Peter and Greg Kennedy in Winston-Salem, and later with Laura. It's a little weird for the feeder to figure out, but ultimately not too hard.

### Related patterns

Subtract a club:

Other related patterns:

55513p

This could be done with 10 clubs with the feeder just doing all 3's. But that might be boring for the feeder and might also create a collision possibility when he is passing to the person on his left and receiving from the person on his right.

### 3 5vs3

Clubs: 8  
Inventor:  
Will and Rhonda...  
Comments:

Jugglers: 2  
Rhonda  
can occasionally get this for a few cycles.  
Good practice for 10 club 4-count and the 15 club feed. You can also feed 14 clubs by having the feeder do 4 club double singles 2-count and the feedees doing 5 club 4-count. Will has done this with Peter and Laura.

Related patterns  
Other related patterns:

5vs3vs3

### 4 5vs3vs3

Clubs: 11  
Inventor:  
Will and Rhonda...  
Comments:

Jugglers: 3  
Will  
have gotten this with Athena long enough for someone to lie down underneath us and film it.  
Good practice for the 15 club feed.

Related patterns  
Other related patterns:

5vs3, ShootingGallery (righty-lefty version of this)

## 5 7club3count

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

folklore

can run this all day.

This is 966, the symmetric version of 7 club doubles.

Jon's workshop in Alby suggested changing (4.5) 3 to 4 (3.5) (French 3-count), 3 (4.5) 3 to 5 (4.5) 1, or (4.5) 3 3 to (4.5) 4 2.

Techno

PPSfeed

## 6 7countFrenchPopcorn

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Jon and Mandy, in a workshop in Ollerup.

may never have tried this.

This is 10 6 6 6 8 6 7, the Frenchified 7countPopcorn. In this one, the same club goes back and forth each time. Another way to think about it is as 534(pass)333, so you can replace the 534 with different 4-club siteswaps and 333 with different 3-club siteswaps, as in 55513p. (If you replace 534 with 444, you get the slow version of French 3-count.)

## 7 7countPopcorn

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Jon, in his workshop in Alby, but it's folklore.

did this in Toulouse in 2013.

This is 10 6 6 6 9 6 6, the symmetric version of standard 7 club popcorn.

## 8 867777

Clubs: 7

Inventor:

Will and Rhonda...

Jugglers: 2

Will

did this at the Lee house in October 2012. It's not too hard.

### Related patterns

Other related patterns:

## 9 8club3count

Clubs: 8

Inventor:

Will and Rhonda...

Jugglers: 2

Rhonda, among others

may have done this. Will did it with Colin in Portland.

10     8SinglesSwitchingSides

Clubs: 8  
Inventor:  
Will and Rhonda...  
Comments:

Jugglers: 2  
Mandy  
don't work on 8 singles much.  
You can also pass crossing and throw the single self straight up. This works better than some of Mandy's other challenges (e.g. 10 club 5-count, 3-count, and 1-count.)

11     942

Clubs: 5  
Inventor:  
Will and Rhonda...  
Comments:

Jugglers: 2  
Daniel  
haven't done this. Daniel and Will did it successfully in Irvine.  
This has three "magic" clubs and two clubs that stay on their own sides. You can make the 4's actual flips instead of just holding them.

Related patterns

Add a club:

945  
ChristophsColors (972)

## 12 966777

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Doreen, in San Diego

haven't tried this. It worked with Doreen.

This is a nice 7 club 4 handed pass pass self. For a synchronous one, see [Ampersand](#).

## 13 9countPopcorn

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Evl, but Clara taught it to Will in Durham.

did this at the Lee house in October 2012. It's fun when you get the sequence down.

Each person does 967776777. The 9 club is magic.

## 14 Ampersand

Clubs: 7

Inventor:

Will and Rhonda. . .

Comments:

Jugglers: 2

Rhonda, from Tom Hamill's 6-club Nizer's Nightmare.  
can run this all day.

For a 7 club 4 handed pass pass self, see [966777](#).

Other related patterns:

[Ampersand8](#)

[Nizer's Nightmare](#)

[6-club PPS](#)

It's also fun to do crossing singles and straight doubles.

979728 (thanks, Caspar!) is very similar, but slightly harder.

[AmpersandSwitch](#)

[AmpersandFeed](#)

[Ollerand](#)

## 15 AmpersandFeed

Clubs: 11

Inventor:

Will and Rhonda. . .

Comments:

Jugglers: 3

Will

haven't tried this. Will did it with Peter and Stefan in Québec in 2015.

This is quite fun. There are some collision issues but you can figure out how to avoid them. Feeder starts with three and does extreme extreme self middle middle self. Left feedee starts with four and does pass heff heff. Right feedee starts with four and does heff pass heff.

### Related patterns

Other related patterns:

We should also try crossing singles and straight doubles.

[Ampersand](#)

16     AmpersandSwitch

Clubs: 7	Jugglers: 2
Inventor:	Ellen Winters
Will and Rhonda...	have not tried this. Will did it with Ellen in Québec in 2015.
Comments:	This is Ampersand with two people switching the two roles. It's rough on the head but quite fun.

Other related patterns:

Ampersand

17     Ampersand8

Clubs: 8	Jugglers: 2
Inventor:	Rhonda, from basic <u>Ampersand</u> .
Will and Rhonda...	can run this a bit.
Comments:	This is just 8 club 1-count (97) with heffs on every third throw (PPS).

Related patterns

Subtract a club:

Ampersand

868677

Other related patterns:

This is 979788. You can also do it with half as many passes, 978888.

## 18 AntoniosAngst

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Antonio, in Vitoria

did this in Irvine in August 2009.

This is really a two person pattern; the top line in the diagram above is just to show that the top person is throwing multiplexes. Will starts with two in each hand and throws left to right self, then right multiplex with one club going as a single to his left hand and one as a crossing double to Rhonda's right, then right to left self, then left multiplex. Rhonda throws standard three-count, passing straight, with the first pass from the left hand, maybe slightly techno-ish.

### Related patterns

Other related patterns:

AntoniosAnxiety, FiveWithBenefits

## 19 AntoniosAnxiety

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Antonio, in Vitoria

did this in Irvine in August 2009.

This is really a two person pattern; the top line in the diagram above is just to show that the top person is throwing multiplexes. Will does the same thing as in AntoniosAngst, except that he has time to do an extra 2 in the hand that just threw the multi (and do it as a shoulder throw, albert, or whatever). Rhonda throws BogotaPopcorn, passing straight, starting with a triple from the left hand. She has to wait a little on the triples since the incoming passes are doubles instead of the normal singles in BogotaPopcorn.

### Related patterns

Other related patterns:

AntoniosAngst, FiveWithBenefits

## 20 Banana

Clubs: 9

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Stefan Brancel and Ben Hestness

are working on this. Will got a few runs with Peter in Québec in 2015.

This is 5 5 5 4p 4 4. Make the 5's doubles and the 4's singles.

### Related patterns

Other related patterns:

[Plantain](#), [PlantainFeed](#)

## 21 BlackBeastOfArrgh

Clubs: 6

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Will, but of course others have too. I think Daniel named it.

have worked on this. It's quite challenging, but doable and really fun.

This is 945, one of the monsters to slay en route to the holy grail, [ZapOpusTwo](#).

The 9 clubs are magic.

You can start with [ZapOpusOne](#) and have one person go into the Black Beast, since the two are compatible with each other.

To start, the person throwing crossing has two clubs in each hand. She throws left to left crossing double and then a right to right crossing zap. The other juggler starts with one club in each hand, waits as long as possible, and then throws a right to left straight double and then a left to right straight zap.

(This is the way Will and Rhonda start because Rhonda doesn't want to throw a left zap when she has two clubs in her left hand. For other people, it might make more sense for the straight person to start with four clubs and the crossing person to start with two. Then each person can start with a right double.)

### Related patterns

Add a club:

[ZapOpusTwo](#) (975, the holy grail)

999582, which is the Black Beast (almost; it's 952 instead of 954) against 998. This is pretty tough, but doable with Caspar in Millstreet in 2014. Easier than the grail.

Subtract a club:

942

## 22 Blinky

Clubs: 8

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Christoph, who learned it with Evi and Nikki

have never done this. Will did it with Christoph in Someren, with some success.

This is an eight club, right-handed, funky wunky one-count. It's not really harder than the standard eight club one-count with straight doubles versus straight singles, and it's quite fun. You can code it by using four red and four green clubs so the whole pattern flashes red to green.

## 23 BogotaLine

Clubs: 10

Inventor:

Will and Rhonda...

Comments:

Jugglers: 3

someone in Bogotá, probably Nene.

probably did this in Bogotá.

To do this, the middle person has to make every left hand throw over the head and do a half pirouette. This gets pretty dizzying. Maybe I'm misremembering this?

# 24 BogotaPopcorn

Clubs: 7  
Inventor:  
Will and Rhonda...  
Comments:  
Jugglers: 2  
Wilson “Nene” Vargas taught it to us, but it’s folklore as five-count popcorn.  
can run this.  
We had fun doing this one with Steve Healy. We used oversize tennis balls for the clubs that do triples.  
You can replace the 5 3 with 4 4.

Related patterns  
Other related patterns:

BogotaFeed  
BogotaBigFeed

# 25 BogotaFeed

Clubs: 10  
Inventor:  
Will and Rhonda...  
Comments:  
Jugglers: 3  
Jon?  
have never tried this. Will did it with Rasmus and Jon in Alby.  
Fairly tricky for the feeder because the passes are coming from unexpected places.  
Would be fun to do with Steve Healy sometime using tennis balls for the triples.  
This is asymmetrical. The clubs from the different feedees do different things in the feeder’s hands.

Related patterns  
Add a club:

BogotaBigFeed

Other related patterns:

BogotaPopcorn  
Why not (This is what the feeder is doing.)

## 26 BogotaBigFeed

Clubs: 11

Inventor:

Will and Rhonda...

Comments:

Jugglers: 3

Will

have never tried this. Will did it with Rasmus and Jon in Alby.

Symmetric version of the classic 11 club feed from the 7 club 6-count popcorn.

Fun for the feeder and not as hard as it might seem.

### Related patterns

Subtract a club:

BogotaFeed

Other related patterns:

BogotaPopcorn

## 27 Bookbag

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Christoph and Brook.

haven't done this. Christoph taught it to Will at Lee in 2014 and we got some multis.

This is Bookends-86777 with the heffs replaced by gathers and multiplex passes: Change (pass) (pass) (self) (pass) (heff) [repeat] to (pass) (pass) (self) (pass) (collect) (self) (multiplex) (self) (pass) (heff). The trick is throwing the multi to the right height (trial and error) and catching them right: The catcher throws the heff just before the multi arrives. If he throws it too early, it lands with the multi. So hold that club as long as possible and throw the heff at the last moment before the multi arrives. It's quite fun.

### Related patterns

Other related patterns:

Bookends-86777

## 28 Bookends-86777

Clubs: 7

Inventor:

Will and Rhonda...

Jugglers: 2

Jon and Mandy, at their workshop in Ollerup.

did this in Millstreet in 2014. It's not too hard.

## 29 BoulderCountdown

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Staffan in Boulder in 2014

have not done this. Will did it with Staffan in Millstreet in 2014.

Like the CopenhagenCountdown, both jugglers are doing 3-count, then 2-count, then 1-count, then 2-count. (So it's really a countdown and then countup.) But it's easier just to memorize the sequence of throws: PSSPSPPS. (Eight beats, so it's not symmetric.) For the second juggler, one of the selves is replaced by a hold.

I can't remember if the original pattern had straight passes or crossing. This one has crossing to avoid collisions, but you could also switch one juggler's hands (preferably, the top line so he starts PSSPSPPS right-handed) and make all the passes straight.

### Related patterns

Other related patterns:

CopenhagenCountdown, BoulderFeed, BoulderBigFeed

## 30 BoulderBigFeed

Clubs: 11

Inventor:

Will and Rhonda...

Comments:

Jugglers: 3

Staffan in Millstreet in 2014

have not done this. It would be fun to try, but it might be pretty tough for the feeder. Might be collision-prone too.

Feedees Tom and Mary are doing the BoulderCountdown and the feeder is throwing straight singles to TMMT MTTM.

### Related patterns

## 32 BrunosAmbidextrousNightmare

Clubs: 9

Inventor:

Will and Rhonda...

Comments:

Jugglers: 3

Staffan and Jochen in Durham.

haven't worked on this because Will wishes to preserve his marriage. Will worked on it with Aidan and James in Durham with reasonable success.

The diagram above doesn't show the selves. The full "9-count" pattern is PSSPSSPSS. When you do this, imagine Bruno's hands juggling the three jugglers. If the feeder starts in Bruno's right hand, as in the pattern above, everyone starts right-handed. The 7-count pattern is PSPSPSS, and you use the same starting rule. The 5-count pattern is PSPPS, and you use the opposite rule: If there are two balls in Bruno's right hand, everyone starts right-handed. (The 3-count version would be PPP with the original rule, but this doesn't seem feasible.)

The reason for this is that on the third pass, the feeder is leading one feedee up through the middle. If the feeder is in Bruno's right hand, he that third pass should come from his right hand so that giving the feedee a big lead spreads the clubs out instead of making them crash in the feedee's face. So you want that pass on an odd beat. In the 9-count and 7-count, that pass is on beats 7 and 5, respectively. In the 5-count, that pass is on beat 4, so you reverse the rule.

## 33 ChaChaPeter

Clubs: 8

Will and Rhonda...

Comments:

Jugglers: 2

Will, in December 2006, inspired by Peter.

tried this in Alby, but it was surprisingly hard. Staffan and Will got several cycles of this in Lexington. It is doable and fun!

Try this with lofty singles and doubles. They may get a little random, but that's ok. In particular, the top juggler should really loft the first left-handed single (i.e., the second left-handed throw), to avoid rushing the bottom juggler.

## 38 ChristophsColors

Clubs: 6

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Christoph Shumacher

have not done this. Will did it with Christoph in Durham.

This is 972. Do it with 3 red and 3 yellow clubs, so that all doubles are yellow and all singles are red. Or do it with 2 red, 2 blue, and 2 yellow clubs, so that each double and answering single are the same color. The former looks better to jugglers in the pattern, and the latter looks better to spectators.

## 39 CopenhagenCountdown

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Jon and Trevor Lewis, in Jon's back yard in Copenhagen

have not done this. Will did it with Staffan in Millstreet in 2014.

Jon wrote this up in Kaskade 66. Both jugglers are doing 3-count, then 2-count, then 1-count, then 2-count. (So it's really a countdown and then countup.) But it's easier just to memorize the sequence of throws: PSSPSPPS. (Eight beats, so it's not symmetric.) For the second juggler, two of the selves are replaced by zips. However, if you start as in the diagram above, the very first zip is replaced by a normal self. The siteswap is 9629669669969929.

## 94 Programmer1

Clubs: 6

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Doreen and Staffan, in San Diego

can probably run this.

The point of this one is that either side can “program” the other one into switching sides. To program the switch in one direction, do 3.5p 3.5p 1 [3] 3.5p 3.5p 3; in the other, do 3.5p 3.5p 3 [3.5p 3.5p] 3.5p 3.5p 1. (Note that the union of the throws in the two transitions is the same as the set of throws of the juggler doing more clubs, a common feature of programming patterns.)

## 101 Self centered

centered.eps Local: 7 6 7 8 7 2 7 8 2

Clubs: 6  
Inventor:  
Will and Rhonda...  
Comments:

Jugglers: 2  
Christian from Zurich  
haven't tried this. Will did it with Christian in Someren.  
The point of this one is that the passes are easy, but the self sequence is tricky, so you think about the selves. A (crossing passes) starts with four clubs at the beginning of the sequence. B (straight passes) starts with 2 clubs and does 7 8 2 7 6 7 8 7 2 ....  
You can color code this by having the clubs A throws in order be white, blue, red, red, and the clubs B throws be white, blue. Then the white clubs do the passes and zips, the red does the heffs for A, and the blue does the heffs for B.

## 102 Shamrock5

Clubs: 5

Inventor:

Will and Rhonda...

Jugglers: 3

Take That Out, a.k.a. Florian, Jochen, and Jochen

have done this, but Will mostly does it with Athena and Dave.

### Related patterns

Add a club:

Other related patterns:

#### Shamrock6

Assume Dave is starting with 3 clubs, Athena is to his left, and Will is to his right. Then the hand order is DR, WL, AR, DL, WR, AL. The global siteswap for the 5-club version is 50673955, and the local one is 57503569. For the 6-club version, replace the 0's by 8's. Here is what Dave's hands do:

575 Zap out the first three clubs.

8 Lob a club (caught from Will's left) left-handed to Athena's left.

35 Hand the club that Will just handed him over from his right to his left, and then hand it to Athena's right.

6 Just hold a club in his right hand.

9 Throw a self from his left to his right.

89445, 84945, 84495, and 95556 all sound challenging, but might be interesting and possible since they're only six clubs.  
This is a good warmup to FrankZappalot and Heffalump.

## 144 ZapOpusOne

Clubs: 6

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Will

can run this all day.

This is interesting because each of the  $\binom{4}{2}$  pairs of hands has exactly one club moving back and forth between the two hands. This is easy to see if you use six different colored clubs. (See [OllerupPopcorn-10-7-7](#). And John Spinosa noticed that 552 has the property that each of the  $\binom{4}{3}$  groups of three hands has exactly one club cycling through it.)

To start it, Rhonda holds two clubs in each hand. She throws a right crossing zap, then a left straight lofty single, then a right crossing self, then repeat on the other side. Will starts with one club in each hand and does a right crossing self, then a left straight zap, then a right crossing lofty single, then repeat on the other side.

It's fun to throw the zaps as chops. Will did this with Doreen in Göttingen and with Amiel in Jamul.

It's also fun to have one person go into the [BlackBeastOfArrgh](#), since the two are compatible with each other.

## 146 ZapOpusOneHalf-75666

Clubs: 6

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Will

can run this all day.

There are a couple collision dangers where crossing zaps go under crossing passes. If you keep the zaps low and the passes high, and focus on the timing (the passes are thrown slightly before the zaps), they aren't problems and you don't have to choose lanes.

The same club is zapping every time, so it may help in remembering the sequence to use a different color club for that one at first.

### Related patterns

Other related patterns:

All the other Zaps.

## 147 ZapOpusTwo

Clubs: 7

Inventor:

Will and Rhonda...

Comments:

Jugglers: 2

Will

haven't had much success with this. Will started to get it with Caspar at the Lee house in December 2012.

The world now calls this pattern Willy Wonka's Holy Grail, and there is a growing list of dragon patterns to slay as you approach the grail. (A dragon throw is a single 95 combination.)

One would be the grail against 7 club 1-count (977757), although it's not easy.

### Related patterns

978 is hard, but feasible for a few rounds. Will has done it with people like Ross, Berengar, Mandy, Peter, Rasmus, and Brook.

Subtract a club:

756 is ZapOpusOne, which is fun.

456 might be called ZapOpusZero, and might be a good way to learn zaps.

BlackBeastOfArrgh (945)

972 is ChristophsColors.

Clubs: 9

Inventor:

Will and Rhonda...

Comments:

Jugglers: 3

Will

haven't tried this but really should.

This could be varied by switching who stands where. It could also be changed to a LLLRRR hand order, but with LRLRLR, all the throws are straight, which seems less likely to give collisions. The zaps here are a little faster than regular zaps (2.3 instead of 2.5) and the singles are a little higher (3.7 instead of 3.5).

Related patterns

Other related patterns:

ZapOpusOne**149 Other 7-club chestnuts**

Some old favorites that haven't yet gotten added to the master list:

- Every other triples (makes a nice 11-club feed)
- Singles versus triples (good practice for 8 triples)
- Eleven club gorilla feed (all passes are doubles for the easiest rhythm)
- Classic popcorn (the right hand throws triple self, double pass, single self)
- Classic popcorn elongated (as above, but replace 3(2)1 with 3(2)(2)1(2))
- Lopsided popcorn (one juggler does triple self, double pass; the other does single self, double pass; good practice for 10-club feed and 11-club feed respectively)
- 11-club feed from 7-club one count
- Oddz Goddz (RRLL: really hard but doable if you lob the passes super high)
- Staggered goddz (one person feeds doubles to the other person's right and left hands; the other person does Oddz Goddz)
- French 3-count (867)
- Fast slow simul (Only hard because of the collision. To avoid it, the fast person should throw the crossing pass from the inside to the outside, and the slow person should throw that pass from the outside to the inside. To start, fast person (with 4 clubs) throws to slow's left hand, and slow person (with 2 clubs in right hand) throws from right hand to fast's left hand.)
- Classic PPS (Keep the singles low and the doubles high. There's a collision risk, but you can avoid it if you watch for it.)
